Nikhil Joshi

Site Reliability Engineer

nikhil.joshi@zenvora.example | Bengaluru, India

Professional Summary

Site Reliability Engineer with 10 years of professional experience, specialising in Observability, SLO design and Terraform. Known for owning outcomes end to end and for working closely with customers and colleagues from other functions.

Experience

Site Reliability Engineer — Zenvora Technologies Pvt. Ltd., Bengaluru
Mar 2021 – Present

- Introduced service-level objectives; mean time to recovery fell from 94 to 28 minutes.
- Reliability lead for the Atlas cut-overs.
- Rightsized workloads for Project Ember.

DevOps Engineer — Redwood Cart
Jan 2019 – Feb 2021

- Cut deployment failures by 60 percent.

Systems Engineer — Nimbus Datasystems
Jul 2016 – Dec 2018

- Maintained build and release tooling.

Key Projects at Zenvora

- **Project Atlas** (Aug 2022 – Mar 2024): Observability and cut-over reliability. Break the original Django monolith behind Pulse into Go and FastAPI services running on Kubernetes.
- **Project Beacon** (May 2023 – Feb 2025): Infrastructure and observability. Build the company data platform: an Iceberg lakehouse with Airflow and dbt pipelines feeding analytics and machine learning.
- **Project Ember** (Aug 2025 – Dec 2025): Workload rightsizing. Cloud cost optimisation (FinOps): rightsizing, savings plans, storage tiering and per-team cost allocation.

Education

- B.Tech Computer Science, RV College of Engineering, Bengaluru, 2016

Skills

Observability, SLO design, Terraform, Kubernetes, Incident response

Certifications

- Certified Kubernetes Application Developer (CKAD)
- HashiCorp Terraform Associate
