5	Supported platforms
6	Performance budget
7	Feature flags and signing
8	Disclaimer

1. Objective

To ship web and mobile changes predictably, accessibly and without crashing customers' phones.

2. Applies to

All engineers and designers shipping Pulse web and mobile apps.

3. Release trains

- Web: release every second Tuesday.
- Mobile: monthly release train on the first Tuesday of each month.
- Mobile rollouts are staged: 5 percent, then 25 percent, then 100 percent, with a 24-hour hold between steps. Halt the rollout if crash-free sessions fall below 99.0 percent.

4. Accessibility

All new screens meet WCAG 2.1 level AA. Use Zenith Design System components first. An accessibility audit of the web app runs every quarter. The UX lead signs off design quality before release.

5. Supported platforms

Web: the latest two versions of Chrome, Edge, Safari and Firefox. Mobile: Android 9 and above, iOS 15 and above.

6. Performance budget

Largest Contentful Paint under 2.5 seconds. Initial JavaScript bundle at most 250 KB gzipped. Crash-free sessions at least 99.5 percent.

7. Feature flags and signing

All user-facing changes ship behind feature flags. App signing keys are held by DevOps & Cloud in a secured vault and are never stored on personal laptops.

8. Disclaimer

Zenvora Technologies Pvt. Ltd. reserves the right to change or revise this policy at any time, in any lawful manner, with notice to employees through ZenPeople and Slack #announcements.

Fictional document created for a GraphRAG demonstration project. All people, companies and figures are invented.
